I am slow on the uptake on charts this complex. If there is a simpler spreadsheet or summary, we should be ready to share with Bob. Chances are he will still have the request for summary data charts in the morning. Parameters sampled, how many wells show levels higher than some reference level, and which are below reference levels of concern.

Jon and Angela- I boiled down the previous chart to give a sampling of constituents sampled and the status pre and post treatment.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Most of these homes have had

20-70 sampling events with analysis for up to about 100 contaminants over the past 3 years.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Hope this gets closer.

I still have to fill in the 2 Bis ethyl phthalate tomorrow morning but I'll be in a little after 6

Karen,

If you can add the information we talked about early tomorrow that would be great. Kudos to your group for the tremendous effort to get through all the data so quickly, especially when more keeps coming.

Will also send these to Jon so he can forward to HQs tonight with explanation that we will fill in more details in the morning.

Angela
